SUMMARY

I'm a full-stack engineer with a strong focus in frontend development. I enjoy building clean, responsive, and user-friendly web applications using tools like HTML, CSS, JavaScript, and React. While I'm confident working across the stack — including backend logic with Node.js, Firebase, and REST APIs — my real strength lies in creating smooth and engaging interfaces that people enjoy using. I care deeply about writing clean code, paying attention to detail, understanding system designs and building things that actually solve problems.

I'm always open to learning, growing with a team, and contributing to products that have real impact.

PROFESSIONAL EXPERIENCE

FREELANCE SOFTWARE ENGINEER

NOV 2024 - Present

REMOTE - CONTRACT

- Designed and developed custom websites and web apps for small businesses and startups, focused on clean UI and fast performance.
- Built landing pages, dashboards, e-learning interfaces, and product catalogs using HTML, CSS, JavaScript, and React.
- Integrated third-party APIs and Firebase for dynamic content and user authentication.
- Maintained long-term client relationships through consistent delivery, attention to detail, and ongoing support.
- Managed projects end-to-end: gathering requirements, writing clean code, deploying to production, and handling feedback loops.

FULLSTACK DEVELOPER (FRONTEND FOCUSED)

JAN 2025 - Present

HYPERSOFTMEDIA - REMOTE

- Built and maintained responsive, accessible web applications using React, HTML/CSS, and JavaScript, improving user experience across desktop and mobile.
- Collaborated with designers and backend developers to deliver full-stack features using Firebase, Node.js, and REST APIs.
- Optimized frontend performance, reducing load times and improving Core Web Vitals through code splitting and lazy loading techniques.
- Led frontend architecture decisions for multiple client-facing projects, ensuring scalability and clean component structure.
- Regularly contributed to code reviews, tech discussions, and internal documentation to improve team workflow and code quality.

PROJECTS

RECRUITERS HUB - DEVELOPER PROFILE SEARCH PLATFORM

<https://recruiters-hub.netlify.app/index.html>

- Developed a frontend-first MVP that allows developers to upload detailed profiles and resumes, while recruiters can search and filter based on specific keywords.
- Implemented real-time Firestore querying with keyword-based search and live profile preview using query snapshots.
- Built a dynamic user settings page, recruiter view-only profile page, and secure login/signup with Firebase Auth.

TRUCKEET

<https://truckeet.ca/>

- Designed and developed a responsive logistics platform that allows users to book trucks, track deliveries, and manage shipments.
- Implemented real-time location updates and booking status tracking with Firebase and Google Maps API.
- Built an admin dashboard for fleet management, driver assignments, and performance monitoring.

SHOPNIG

<https://shopnig.com/>

- Built a fully functional online store with product listings, cart functionality, secure checkout, and payment processing via Stripe API.
- Managed global state with Redux for seamless cart, authentication, and order tracking.
- Integrated Firebase for backend services, including authentication, database, and cloud storage.

TECH STACK

HTML, CSS, JQUERY, VANILLA JS, REACTJS, NODE JS, EXPRESS JS, FIREBASE, GIT, TAILWIND

ADDITIONAL INFORMATION

- Languages:** ENGLISH
- Certifications:** CODE ACADEMY FRONTEND ENGINEER
- SOFT SKILLS:** TEAM COLLABORATION, ATTENTION TO DETAIL, PROBLEM SOLVING, COMMUNICATION
